ANNUAL SUBJECT INDEX

Vol. 12 no. 6 1996
Pages 567–569

Amino acids
selection, Fourier transform, protein analysis 553
sequence identification, expert system, development 311
Angelos Kalogeropoulos
homage, special issue 359
Anopheline mosquitoes
species identification, rule-based system 491
AppleScripts
sequence data automatic submission to BLAST server 257
Bi-De
phylogenetic processes, stimulation 469
Biopolymers
primary structure, periodicities, Fourier transform 49
BioSCAN
sequence database searching 191
BLAST
server, sequence data automatic submission, AppleScripts 257
CLEANUP
redundancy removal, nucleotide sequence database 1
Compatibility matrices
calculation/display, programs 291
Computational analysis
transcriptional regulatory elements, introduction 361
CONRAD
conserved/variable regions identification, proteins, scale-space filtering 197
Correlation patterns
detection, GenomeInspector 405
Correspondence discriminant analysis
protein–nucleic acid sequence comparisons 519
Data rotation
image, volume, 1-pass/3-pass algorithms 549
Databanks
sequence, automatic search system, FastAlert 129
Database
animal genome, development/search system 231
extensible network query unification system, ENQUire 145
sequence, searching, BioSCAN 191
Dirichlet densities
sequence homology detection, proteins 327
DNA
mitochondria, simulation model, social/geographical/population effects 481
motif discovery, ParaMEME 303
positional sequencing by hybridization 19
protein, sequence comparison, methods 497
sequence, ordering, PARODS 269
sequence, two-dimensional graphical representation/intron–exon discrimination 55
sequences, frameshift error-containing, alignment, novel algorithm 31
structural analysis, transcriptional regulatory elements, detection 441
structure variability, regulatory region prediction 375
Electron micrographs
processing, IBIS version 3, description 241
Electrophysiological data
pre-recorded, mains interference removal 539
ENQUire
extensible network query unification system 145
Escherichia coli
genes, detection, principal component analysis, codon usage diversity 213
syntactic recognition, regulatory regions 415
FastAlert
automatic search system, sequence databanks 129
Flow cytometry
phytoplankton identification, neural networks/statistical methods 9
Fourier transform
amino acid selection, protein analysis 553
biopolymers, primary structure, periodicities 49
Gene structure
prediction, novel approach 161
Genes
Escherichia coli, detection, principal component analysis, codon usage diversity 213
eukaryotic, signals prediction, Hamming-Clustering method 399
Saccharomyces cerevisiae, novel, function, approach, upstream activation, sequences 363
Genetic algorithms
RNA folding, annealing mutation operator 171
Genome
animal, database, development/search system 231
reorganization, comparison, qValue 181
GenomeInspector
correlation patterns, detection 405
Genotype frequency
multilocus, computation, algorithm 455
GEOMETRY
sequence analysis, nucleotides 297
Hamming-Clustering
signals prediction method, eukaryotic genes 399
HBexplore
hydrogen binding patterns, identification/analysis 281
Hexamer frequency analysis
vertebrate promoter region, prediction 391
Hidden Markov models
sequence analysis, extension/analysis 95
HTP
α-helical domains, topology, prediction 41
Hydrogen binding
patterns, identification/analysis, HBexplore 281
IBIS version 3
description, electron micrographs processing 241
Image Library of Biological Macromolecules
description 227
IR spectroscopy
microbial fingerprinting, programs 353
Kohonen map
visualization tool, protein sequence analysis 447
LALNVIEW
pairwise sequence alignment viewer, graphical 507
LITTLE KEVIN
homology estimation, proteins 347
Matrix matches
position–weight, statistical significance, nucleotides 431
Membranes
proteins, α-helical domains, topology, prediction, HTP 41
Microorganisms
fingerprinting, IR spectroscopy, programs 353
Mitochondria
DNA, simulation model, social/geographical/population effects 481
Molecular structure
computation, constraining volume 319
MOTIFIND
proteins, motif identification 109
MulBlast 1.0
protein sequence analysis 463
Multiple alignment
algorithm, weak pattern detection, periodic distribution study case 383
NAMOT2
nucleic acids modelling, revision 25
Neural networks
HTP, α-helical domains, topology, prediction 41
MOTIFIND, proteins, family identification 109
phytoplankton identification, flow cytometry 9
Nucleic acids
modelling, NAMOT2, revision 25
sequence, functional element identification, novel tuple search algorithm 71
Nucleotides
position–weight matrix matches, statistical significance 431
sequence analysis, GEOMETRY 297
sequence, database, redundancy removal, CLEANUP 1

© Oxford University Press

P450-containing systems
World Wide Web, directory 237
ParaMEME
motif discovery, DNA/proteins, parallelization/WWW interface 303
PARODS
DNA sequence ordering, parallel algorithms 269
PDBFinder database
summary, PDB/DSSP/HSSP, information with added value 525
PHYLO–WIN
sequence alignment, molecular phylogency, tool 543
Phylogenetic processes
stimulation, Bi-De 469
Phylogenetic trees
display, PCs, TreeView 357
Phytoplankton
identification, flow cytometry, neural networks/statistical methods 9
PM
protein sequence analysis, audification 251
Polymerase chain reaction
primer design/analysis, Primer Master 253
Polypeptides
hydrolysis pathway, analysis 81
Positional sequencing by hybridization
DNA 19
Primer Master
PCR polymerase chain reaction design/analysis 253
Principal component analysis
genes detection, *Escherichia coli*, codon usage diversity 213
Programs
Bi-De, phylogenetic processes stimulation 469
CLEANUP, redundancy removal, nucleotide sequence database 1
compatibility matrices calculation/display 291
GenomeInspector, correlation patterns, detection 405
GEOMETRY, sequence analysis, nucleotides 297
HBexplore, hydrogen binding patterns, identification/analysis 281
HTP, α-helical domains, topology, prediction 41
IBIS version 3, description, electron micrographs processing 241
LALNVIEW, pairwise sequence alignment viewer, graphical 507
LITTLE KEVIN, homology estimation, proteins 347
microbial fingerprinting, IR spectroscopy 353
MulBlast 1.0, protein sequence analysis 463
NAMOT2, nucleic acids modelling, revision 25
ParaMEME, motif discovery, DNA/proteins, parallelization/WWW interface 303
PHYLO–WIN, sequence alignment, molecular phylogency, tool 543
PM, protein sequence analysis, audification 251
polypeptides/proteins hydrolysis pathway, analysis 81
Primer Master, PCR primer design/analysis 253
qValue, genome reorganization, comparison 181
RNA secondary structure visualization, highly parallel computers 205
RNAdraw, RNA secondary structure calculation/analysis 247
SCL, sequence analysis, object-oriented 119
SEAVIEW, sequence alignment, molecular phylogency, tool 543
SIGNAL SCAN 4.0, additional databases and sequence formats 157
TAXOKEY, species identification 185
XFINGER, proteins, pattern/fingerprint database searching 89
Promoter region
vertebrate, hexamer frequency analysis 391
Protein
DNA, sequence comparison, methods 497
Fourier transform analysis, amino acid selection 553
nucleic acid, sequence comparisons, correspondence discriminant analysis 519
sequence analysis, Kohonen map visualization tool 447
sequence analysis, MulBlast 1.0 463
sequence analysis, PM, audification 251
sequences, frameshift error-containing, alignment, novel algorithm 31
threading problems, polynomial time algorithm 511
Proteins
conserved/variable regions, identification, CONRAD, scale-space filtering 197
family identification, MOTIFIND 109
α-helical domains, topology, prediction, HTP 41
homology, gene structure prediction 161
homology estimation, LITTLE KEVIN 347
hydrolysis pathway, analysis 81
motif discovery, ParaMEME 303
pattern/fingerprint database searching, XFINGER 89
sequence alignment, position-specific scoring matrices, improvement, substitution probability 135
sequence homology, detection, Dirichlet densities 327
QValue
genome reorganization, comparison 181
Regulatory elements
transcriptional, computational analysis, introduction 361
Regulatory regions
interfering contexts 423
syntactic recognition, *E.coli* 415
RNA
folding, genetic algorithms, annealing mutation operator 171
secondary structure, calculation/analysis, RNAdraw 247
secondary structure, visualization, highly parallel computers 205
sequence alignment, simulated annealing 259
RNAdraw
RNA secondary structure calculation/analysis 247
Saccharomyces cerevisiae
novel genes, function, approach, upstream activation sequences 363
SCL
sequence analysis, object-oriented 119
SEAVIEW
sequence alignment, molecular phylogency, tool 543
Sequence
alignment, RNA, simulated annealing 259
amino acids, identification, expert system, development 311
analysis, compatibility matrices calculation/display, programs 291
analysis, hidden Markov models, extension/analysis 95
analysis, nucleotides, GEOMETRY 297
analysis, object-oriented, SCL 119
biopolymers, periodicities, Fourier transform 49
data, automatic submission to BLAST server, AppleScripts 257
databanks, automatic search system, FastAlert 129
database, searching, BioSCAN 191
DNA, positional sequencing by hybridization 19
DNA, two-dimensional graphical representation/intron–exon discrimination 55
DNA/protein, frameshift error-containing, alignment, novel algorithm 31
homology, proteins, detection, Dirichlet densities 327
nucleic acids, functional element identification, novel tuple search algorithm 71
nucleotide, database, redundancy removal, CLEANUP 1
ordering, DNA, PARODS 269
protein, analysis, PM, audification 251
proteins, alignment, position-specific scoring matrices, improvement, substitution probability 135
retrieval/multivariate statistics, World Wide Web server 63
upstream activation, *Saccharomyces cerevisiae*, novel genes, function approach 363
Sequence analysis
parallel hardware 473
protein, Kohonen map visualization tool 447
protein, MulBlast 1.0 463
Sequence Retrieval System
novel user interface, SRS v. 4 151
SIGNAL SCAN 4.0
additional databases and sequence formats 157
Sinogram
computation, image alignment 531
Structure
DNA, variability, regulatory region prediction 375

Substitution probability
position-specific scoring matrices, improvement, sequence alignment, proteins 135
TAXOKEY
species identification 185
Taxonomy
TAXOKEY 185
Transcriptional regulatory elements
detection, DNA, structural analysis 441
TreeView
phylogenetic trees, display, PCs 357
World Wide Web
P450-containing systems, directory 237
server, sequence retrieval/multivariate statistics 63
XFINGER
proteins, pattern/fingerprint database searching 89
